DETAILED ACTION

In response to the amendments filed on 7/14/2010, claims 1, 5, 7-10, 12-14, 16-19, 21, 23-26, 28-30, and 32 have been amended. Claims 1, 3-10, 12-17, and 19-26, 28-32 are pending in the current application.

Allowable Subject Matter

1. Claims 1, 3-10, 12-17, 19-26, and 28-32 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. The applicant's instant invention is directed towards a method of use for a jackpot wagering system comprising: a plurality of player terminals that are operable by a respective player to select any of a plurality of different games of chance wherein each game of game having a corresponding jackpot cycle and a corresponding maximum wager. The instant invention is directed towards implementing an accumulation facility that is configured to accumulate in a fashion where a portion of each wager made on any of the plurality of games of chance using any of the plurality of player terminals and for a plurality of random event generators to cause a player who placed a wager on the corresponding game to win a determinable portion of the contents of the accumulation account. Furthermore, the instant invention incorporates a determination facility in response to placement of a player's wager and the accumulation account is determined by a determinable portion of the contents as a function of: a) a size of the player's wager relative to the maximum wager of the player's selected game of chance; b) a playing currency of the player's wager, wherein the player's wager is denominated in one of a number of different permissible player currencies; and the jackpot cycle of the player's selected game of chance.

4. The prior art of record of Weingardt in view of Torango is limited towards teaching a progressive type jackpot machine based upon the well known concept of "pari-mutuel" approach to gaming. Weingardt in view of Torango teaches towards providing a jackpot accumulation account to be a function of at least one of a size of the player's wager; b) a playing currency; and c) a jackpot cycle of the player's selected game of chance. The instant invention performs a function to incorporate all three in order to determine the contents of the accumulation account that may be used in the jackpot system. Additionally, as per applicant's arguments Weingardt teaches away from "a plurality of player terminals wherein each player terminal is operable by a respective player to select any of a plurality of different games of chance for play". Weingardt only teaches a game machine where its principles maybe applied to different games of chance for play (*see pg. 12, applicant's remarks 7/14/2010*). Furthermore, applicant submits that Weingardt does not teach "an accumulation facility" and "a determinable portion of the contents of the accumulation account" as addressed by the applicant's representative on pg. 13—5 in his remarks supplied 7/14/2010. For the reasons stated above, all elements of the claims of the instant invention are not fairly taught or suggested by the prior art of record and are found allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
